

4-H / Digital Photography Student "Fancy Fiber Fotography"

Meet Dayna, a 15 year old high school student in Washington State. She has been enjoying photography for about 3 years now and has a genuine love for animals and nature.

She has been raising alpacas and belongs to 4H, where she's learning to handle and present the alpacas at their best. She has started to enter her photography at both the county and state levels, and has received numerous blue ribbons.

Dayna would like to better her skills and practice new ideas and styles of photography. What better subjects then the alpacas we all love, and what better way for you to help a young 4H & photography student grown and learn in the industry. As well as receive the photos for your farm and pet needs.

She can take pictures of your entire herd for records, pictures of your top Herdsires for advertisement, prized females for sale or adorable cria to send to family! You select the animals, you decide their use! She'll get you the shot!

Do you need shots of your farm? The barn, stalls or fields? Shots of your shearing process, hire her for shearing day to do all your before and after shots! Do you have a training program or other farm services, she can do that too!

As Dayna is a beginning artist and student, her cost is kept to a minimum to expand her opportunities for multiple clients. Take some time to look at her other photography and if you're interested in her services she will be glad to answer your questions and schedule a shoot.

Details:

Photos will be posted on a web site within 48 hrs after the shoot for your selection. Many photos of each animal selected will be taken, you need only purchase the pictures you select from those taken. If the photos are needed sooner, other arrangements can be made prior to the farm visit.
